

Mould Inhibitor/Remover

Nanoproof Mould Inhibitor is a hygiene revolution. Its patented formula combines biocides in a way that amplifies their effectiveness, making them work longer and more gently than previously thought possible.

Area was sprayed and left for 8 months

BENEFITS

- **Powerful:**
Independently tested to be effective against moulds, mildew, algae and fungi and to prevent re-growth.
- **Longer-Lasting:**
Our own testing proves that Nanoproof Mould Inhibitor carries on being effective even when dry, lasting for days and months on undisturbed surfaces. Treated areas have remained mould free for **over a year**
- **Eco-friendly and Gentle**
Nanoproof Mould Inhibitor is water based, non-corrosive and non-hazardous in use and kind to the environment.
- **Application Areas:**
For all non-food contact hard surfaces including tiles, plastics, floors and walls.

Application Instructions:

Remove debris from the surface, spray on and allow to dry. Mould will gradually disappear over several days. For heavy contamination, brush surface when wet. To prevent re-growth, apply spray before mould occurs.

Product Data :

Description : Colourless, odourless mould & mildew remover.
Technical Data : Appearance: Liquid, colourless
Ph : 6 - 8
Testing : Successfully passed European Standards EN1276 against bacteria (TC 15), EN1650 against yeasts (TC 14) and moulds (TC 13) and EN 13704 against spores (TC 128).
Ingredients: Didecyl dimethyl ammonium chloride, benzalkonium chloride, polyhexamethylenebiguanide.

Product Options :

Product state: Ready to Use
Product size: 5L, 20L, 210L and 1000L
